

Acute Neurology and Telestroke

Support for Local Providers and Nursing Staff

Care is available for all acute neurological conditions. Rapid 24/7/365 access to board certified experts in stroke and neurology care in the Emergency Department or Inpatient Units. Stroke specialists work directly with local staff when administering stroke medications.

Physician, Nursing, and Patient Satisfaction

Patients and families benefit from staying close to home and local support resources. Care is provided for the initial encounter and rounding for follow-up care to ensure continuity.

Expert Care. Close to Home.

Bottom Line Improvement

Transferring fewer patients allows hospitals to retain both inpatient and ancillary revenue opportunities otherwise lost to transfers. Acute services have been shown to retain over 70% of patients in their local hospital.

Solution Spotlight

Flexible solutions are available for hospitals of all sizes

Flexible coverage options available from overnights to 24/7/365

Telemedicine technology allows providers to assess, diagnose and manage patient care

Workflow development including protocols and order sets based on best practices
